PROFESSIONAL SUMMARY

Analytical and detail-oriented B.Tech student specializing in Artificial Intelligence & Machine Learning with a strong foundation in Java, Data Structures, and relational databases. Seeking Software Engineer, Java Developer, or Backend Developer opportunities. Proven ability to leverage technical problem-solving, data visualization, and workflow automation to drive process efficiency, optimize system performance, and mitigate operational risk.

EDUCATION

Tirumala Engineering College, Jonnalagadda

2023 – 2027

B.Tech in Artificial Intelligence and Machine Learning

CGPA: 8.24/10.0

- **Relevant Coursework:** Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks.

TECHNICAL SKILLS & TOOLS

- **Core Java:** Collections Framework, Exception Handling, JDBC, OOP (Object-Oriented Programming)
- **Backend & Frameworks:** Spring Boot, REST APIs, Microservices Basics, Maven, JUnit
- **Databases & Languages:** SQL / MySQL, Python, JavaScript, HTML/CSS, Bootstrap
- **Frontend Frameworks:** React
- **Tools & Methodologies:** Git, GitHub, VS Code, Postman, Data Analysis, Risk Metrics Visualization, DSA

PROFESSIONAL EXPERIENCE

Infosys Springboard

June 2026 – Present

Java Backend Developer Intern (Edition 7.0)

Virtual

- Selected for the competitive 7th edition virtual internship program focusing on enterprise-grade Java backend architectures.
- Developed and optimized robust backend applications using Spring Boot, REST APIs, and microservices to enhance data-flow efficiency and automate complex manual workflows.
- Utilized advanced Data Structures and OOP design patterns to maintain strict system reliability and eliminate logic bottlenecks.

SOFTWARE DEVELOPMENT PROJECTS

Student Lifecycle Management Portal

React, Spring Boot, MySQL, REST API

- Engineered a full-stack enterprise data application to process, track, and maintain scalable administrative records and lifecycle documentation.
- Developed robust RESTful APIs in Spring Boot integrated with a MySQL database layout, executing structured query optimizations to ensure high data integrity and lower retrieval latencies.
- Designed automated data workflows for profile orchestration and record validation, mitigating transaction errors and system processing delays.

Interactive Quiz & Performance Analytics Platform

React, JavaScript, State Management

- Developed a scalable interactive platform featuring dynamic state management, reliable data tracking, and automated real-time scores.
- Optimized front-end rendering performance using component lifecycle best practices, resulting in seamless user workflows.

Developer Portfolio & Centralized Knowledge Hub

React, JavaScript, Responsive UI

- Built a responsive, user-centric web interface to consolidate project deliverables, technical system documentation, and insights.
- Implemented clean navigation structures and logical information hierarchies to optimize data retrieval and accessibility.

CERTIFICATIONS & ACHIEVEMENTS

- **Naukri Young Turks Assessment:** Secured 98% in Aptitude & Quantitative Problem Solving, demonstrating advanced analytical capacity.
- **Infosys Springboard Certification:** Certified in ReactJS Front-End Framework Development.
- **TCS iON Career Edge Certification:** Certified Young Professional, validating workplace readiness and operational workflow fundamentals.
- **NPTEL Certification:** Certified in Mathematical Foundations of Machine Learning, highlighting statistical data analytics capabilities.

EXTRACURRICULAR ACTIVITIES

- **Algorithmic Problem Solving:** Actively resolve complex DSA challenges using Java to sharpen logical deduction and structural debugging.
